PROFILE

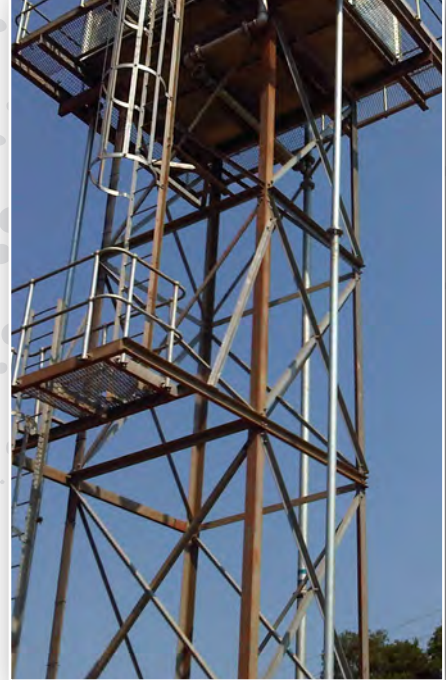

PROFILE

1. INTRODUCTION

T2-Tech Engineers (PTY) Ltd (*hereinafter referred to as "T2-TECH"*) is a company in the Republic of South Africa established in January 2003.

T2-TECH is a full service provider of civil and structural work consulting, technical design and project management, offering seasoned and comprehensive professional service. **T2-TECH** strives to adhere to the highest technical standard and achievements in the industry, enabling customers/clients to achieve their goals beyond expectations.

T2-TECH, in association with reputable companies, provides its customers/clients with proven engineering performance in project management, labour based rural roads construction and maintenance, designs for labour based construction, water reticulation, projects supervision, and community based projects social facilitation.

2. BACKGROUND

T2-TECH was born out of the realisation by the founding member that unless the people themselves of South Africa utilise customised western technology and expertise with an African perspective, prospects for economic growth and development within the rural and urban communities will be minimal, and as such, community development in this new democracy would be meaningless to the communities the government seeks to develop.

The quality of service rendered by individual members of **T2-TECH** over the years in their different environment and the breadth of the experience gained have been harnessed together and is evidenced through successful projects that have been undertaken by the individual members in their respective and previous environments.

T2-TECH is, therefore, uniquely positioned to provide technical and professional services that are pertinent to both rural and urban communities in Southern Africa.

3. VISION

T2-TECH strive to be recognised as one of the leading world class civil engineering business organisation in its core business of activities, both within South Africa, promoting and encouraging capacity building, development and skills transfer, and offering better services and sustainable development to communities.

4. MISSION

The vision of **T2-TECH** drives the company towards the fulfilment of the mission of becoming a world class civil engineering organisation that will succeed in the market place through the delivery of technology and community based sustainable development.

5. VALUES

- **Client orientation** - We believe in charting lasting business relationship through Honesty, Promptness and Confidentiality,
- **Integrity** - We believe in steadfast adherence to Strict Moral Principles and Ethical Codes,
- **Technology driven** - Our projects are driven by Modern Technology,
- **Innovation** - The pulse of our competency is through Innovative Programmes,
- **Skills transfer** - We believe in empowering communities through Skills Transfer.

6. OBJECTIVES

T2-TECH has adopted as its main object and main business, civil and structural engineering consulting, project management and community / labour based project facilitation, as follows:

- 6.1. the provision of cost effective engineering project management and consulting services on small and medium sized industries;
- 6.2. to uplift the previously disadvantaged communities in rural areas by providing them with:
 1. Job opportunities,
 2. Clean drinkable water; and proper sanitation,
 3. Facilitation and upliftment of local emerging contractor,
 4. Safer and proper road infrastructure,
 5. Skills transfer.
- 6.3. to source and provide the best updated technical services to meet the clients' needs of expectations.

T2-TECH focuses on urban and rural development and has procured and been responsible for a wide range of projects including feasibility studies, design, construction monitoring and project management in, amongst others, the following specialist fields:

- Gravel and Surfaced Roads
- Community Water Supply
- Stormwater Control Structures
- Sanitation and Sewerage
- Project and Programme Management
- Agricultural Engineering
- Institutional and Social Development
- Housing Project Management
- Programme Management (PMU)
- Building and Water retaining Structures

In response to identified client needs, **T2-TECH** offers comprehensive engineering and management services, and supports these functions with, amongst others:

- Community Development
- Capacity Building and Training
- Municipal and Multi-Contract Management

7. MANAGEMENT AND PHILOSOPHY

7.1. T2-TECH's philosophy is *"Integrated Technology and Community Based Sustainable Development"*.

This philosophy is derived from co-operation of teamwork, both within the organisation and between the organisation and its customers. Better quality services and complete customer satisfaction are of paramount importance.

T2-TECH endorses and practices quality management systems based on South African acceptable standards. Management system in practice is geared towards satisfying the overall quality objectives of **T2-TECH**. Extraordinary commitment of every member of **T2-TECH** and its customers is a priority.

7.2. The corner-stone of our existence and success is to develop a winning team that will understand the needs of people, generate new ideas and solving development orientated problems with the relevant communities. This is achieved by optimising the time, cost and quality aspects of any project into a unified whole, and the provision of opportunities to the disadvantaged communities through:

- (a) capacity building,
- (b) significant public participation,
- (c) basic services and
- (d) job creation.

8. SERVICES OFFERED / AREAS OF SPECIALISATION

8.1. PROGRAMME AND PROJECT MANAGEMENT

- 8.1.1 Housing Projects (Housing Provision Programme)
- 8.1.2 Turnkey Projects Delivery
- 8.1.3 Municipal Infrastructure Management (PMU)
- 8.1.4 Contracts Administration
- 8.1.5 Repair and Maintenance Programme
- 8.1.6 School Building Programme

8.2. ROADS AND TRANSPORTATION

- 8.2.1 Labour Intensive Technologies
- 8.2.2 Bridges (Design and Monitoring)
- 8.2.3 Construction Management
- 8.2.4 Roads Infrastructure
- 8.2.5 Traffic Engineering
- 8.2.6 Transportation and Pedestrian Planning
- 8.2.7 Traffic and transport planning
- 8.2.8 Rail Infrastructure design and Management

8.3 WATER & SANITATION

- 8.3.1 Bulk Water Infrastructure
- 8.3.2 Sanitation and Treatment
- 8.3.3 Stormwater Management
- 8.3.4 Waste Water Management
- 8.3.5 Water Reticulation

8.4 BUILDING & STRUCTURES

- 8.4.1 Sports and Leisure Facilities
- 8.4.2 Water Related Structures (Reservoirs, Pumpstations, Stormwater drainage)
- 8.4.3 Educational and Medical Facilities
- 8.4.4 Bridges and Multi Storey Structures

8.5 GEOTECHNICAL INVESTIGATION

- 8.5.1 Site Investigation
- 8.5.2 Foundation Designs

8.6 ENVIRONMENTAL

- 8.6.1 Environmental Impact Assessment and Monitoring
- 8.6.2 Environmental Management Systems (Plans)
- 8.6.3 Waste and Waste Water Management
- 8.6.4 Environmental Risk Assessment
- 8.6.5 Landscaping

8.7 SOCIAL FACILITATION & DEVELOPMENT

- 8.7.1 Public Participation
- 8.7.2 Skills Development/Transfer and Training
- 8.7.3 Community Development

8.9 AGRICULTURAL ENGINEERING

- 8.9.1 Agricultural Infrastructure Projects
- 8.9.2 Agro - Projects

9. MAJOR PROJECTS

Project Description	Client Name	Client Project No.	Contact Person	Contact No.	Project Value
